

# FREE 3D MODELS      IKEA SUNDERO

IKEA designer Mikael Warnhammar was inspired to build the SUNDERO series after building a sundeck for his home.

With the leftover pieces of wood, Mikael constructed a chair from the scraps.

The Sundero's three-layer finish makes it extra durable and able to withstand the elements before it needs to be re-glazed.

Adding to that durability: the slats in the seat and armrests are cut with the tree rings positioned vertically, making the wood more durable for outdoor use.

# PROVIZ

[www.proviz.info](http://www.proviz.info)

PROVIZ is company for architectural 3d renderings and visualizations.

We do 3d Models, architectural renders, photomontages, walk-through animations, 3d & 2d floor plans.

More News, Articles, Free 3D Models And Architectural Visualization Tutorials on our Blog Section.
